Tasks:

Loading Movies

Assuming you are loading about 30 movies every week to keep the selection fresh in the booths and to keep your customers coming back for more:

STEP 1:

Start the DVDRIP program from the desktop (if not already running)
Start the CHANNELMANAGEMENT program from the desktop (if not already running)

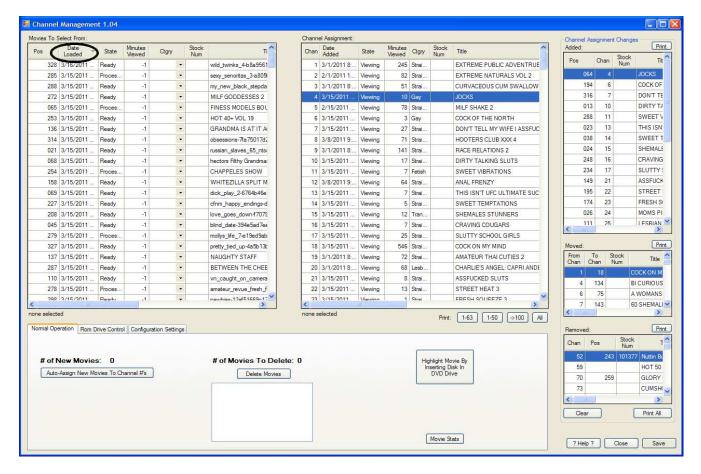

Load all of the DVD drives with the new movies you want to add to the system.

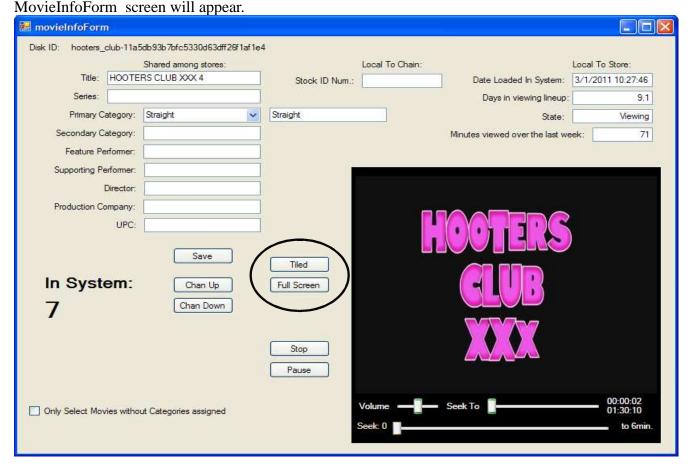

The DVDRIP program will show the Drive, % Complete and ETA, Encoded name of the movie and Current Status for each DVD drive.

Keep the boxes out so you can enter the movie information when done.

It will take 10 to 15 minutes for the movies to be removed from the disks.

Click on the Date Loaded column on the "Movies to Select From" to sort movies by date loaded. As a movie has completed ripping the DVDRIP program will indicate DONE! And the tray will open automatically. The movie will appear at the top of the "Movies to Select From list automatically". Click on the movie and the

Locate appropriate box and fill in the information you want for the particular title. ie.. Title, Category, stock number, Performer etc.. (note that the dvd will list the encoded disk name which may be adequate) etc.. Use the drop down menus where available.

You can also preview the movie by pressing Tiled or Full screen to get more information. Press save when finished .

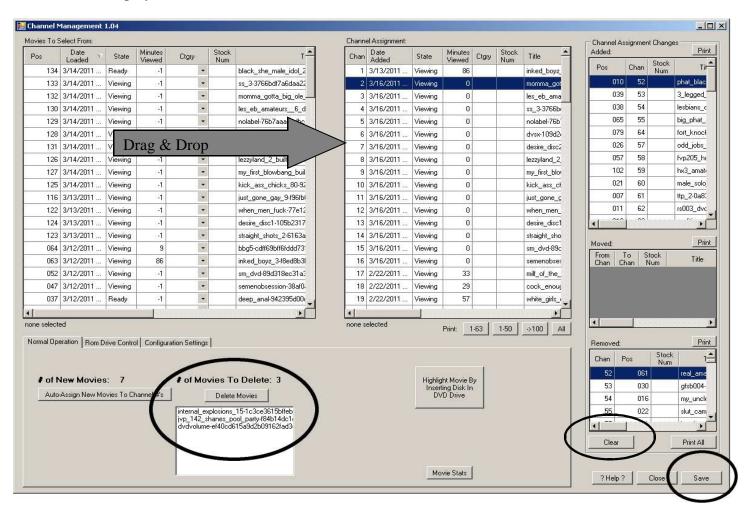

(When done place movies being added in a box so that they are available when you add them to the Marquee the following week.)

Load in additional movies and repeat above until done.

STEP 2:

While the DVDRIP program is processing the new movies you can assign the movies you loaded last week to active channel numbers.

FIRST: Delete any movies that are tagged as ready to delete. The movies will be listed and the total number displayed in the bottom middle of screen. Press "DELETE MOVIES". Press yes when prompted to confirm you want to delete. After a few minutes (depends on the number being deleted) the SAVE button in bottom right corner will be displayed in RED. Press SAVE.

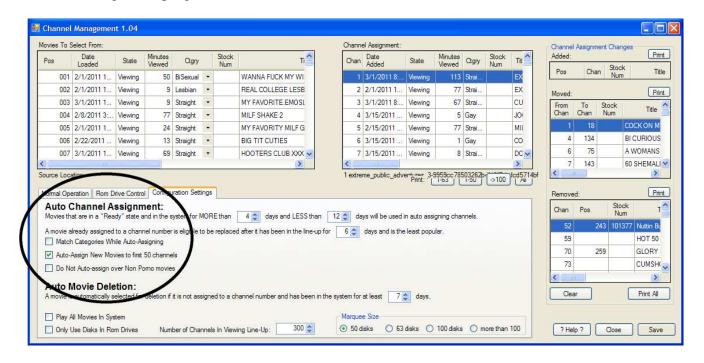

SECOND: Clear the list of Channel assignment changes from previous week by pressing CLEAR (located on right side under Channel Assignment Changes below movies added, moved, removed).

THIRD: The movies that are ready to be assigned to channels are listed as "Ready" status (movies will be sorted by date added from previous step so you may have to scroll down)

You can manually drag those READY movies in the left "MOVIES TO SELECT FROM" window to the specific channel you want to replace in the right window which is labeled "CHANNEL ASSIGNMENT". You can also use the Auto-Assign button to automatically replace the least watched movies in the system.

There are a few configuration options to help make the Auto-Assign button assign the new movies to channels the way you want them to be assigned. These options are adjusted under CONFIGURATION SETTINGS in the Channel management program.

- a) Match categories while Auto-Assigning. This is handy if you group all of your straight, gay and she-male etc. movies to certain channel ranges.
- b) Auto Assign to first 50 channels (63 or 100 depending on Marquee size) This will allow you to keep the Marquee loaded with newer releases and not just randomly over all your channels (Unless you have a Marquee that matches your total number of movies. Usually there are at least 150 channels in a system with a 50 or 100 channel marquee but can be varied to your desired maximum number of channels.)
- c) Option to not Auto Assign over Non Porno movies (check this box if you have non porn movies in your lineup)

FOURTH: After you have either manually or automatically assigned new movies, it's time to change the movies in the Marquee.

Get the box of movies added from the previous week.

PRINT the Channels ADDED from the list on the right hand-side top. Look at MOVED and see where channel 1 was moved too. (Channel 1 always swaps place with another channel). Swap those two movie covers in the marquee.

From the channels added list- REMOVE the channel number box covers that are listed.

Replace with appropriate new movie title from the list. (Before going to marquee put the titles in your box (from previous week) from the MOVIE ADDED list in order- that will speed up the exchange process)

You're done!!! Repeat the same process the next week.

Kiosk Programs:

The programs necessary for kiosk operation:

- 1.rl baservice- controls communication to IO board
- 2.rl_dvdrip- processes movies
- 3.rl_kioskcontrol- controls interaction of all booth functions
- 4.rl_mailer- emails computer system events to corporate headquarters for processing.
- 5.rl_mirror- keeps files synched between kiosks and ripper computer
- 6.rl_notifyus- processes relevant system events for mailer
- 7.rl_playime- processes time movies are watched in each kiosk
- 8.rl_processtransactions- processes kiosk monetary transactions
- 9.rl_sound- controls kiosk sound
- 10.rl_tiledplayer- the main movie processing program
- 11.rl_tp_service- controls the kiosk touchpad operation
- 12.rl_tvservice- controls communication between the kiosk and the booth tv
- 13.rl volume- regualtes the kiosk volume

On the ripper computer the following programs are needed:

- 1.dvdrip
- 2.mirror
- 3.mapmovies
- 4.ibuttonreaderconsole
- 5.ethernetconsole
- 6.notifyus
- 7.mailer

Shortcuts on the ripper computer include:

1.REPORT GENERATOR

Used to generate system reports

2.CHANNELMANAGER

Used to manage dvd channel allocation for kiosks, add, delete movies

3.DVDRIP

used for adding movies and for ripping the movies into proper formats(should always be running)

4.IBUTTON MANAGEMENT

Used for adding, deleting and assigning Ibutton functions

5.ADMIN KIOSK

Used for setting up store parameters – System status, Configuring kiosk rates and time, system information and monitor messages for preview control.

6.ARCADE SYSTEM MONITOR AND PREVIEW CONTROL

Used to monitor kiosk status (time remaining, booth alarm status), clearing booth time and starting preview operation

Assigning Ibuttons:

Open Ibutton management icon on desktop.

- 1.Add users:
- a. Press add user icon and enter name of user
- 2.Add Ibutton to user:
- a. Highlight user by clicking on line making it blue
- b. Press assign Ibutton icon on bottom of screen.
- c. touch Ibutton to blue dot reader.
- 3. Assign functions to users Ibutto
- a. check appropriate boxes for ibutton functions:
- 1. Clear coin
- 2. Clear BA alarm
- 3. Clear TV alarm
- 4. Turn on lights
- 5. Mute system alarms
- 6. Deactivate Ibutton
- 4. Delete Ibutton Permanently:
- a. Highlight ibutton to delete
- b. Press Delete Ibutton

Preview operation:

Open Arcade system monitor and preview control icon on desktop.

Highlight booth desired for preview operation.

Press "Start Preview" icon in open window.

Status will change to "starting"

Insert movie into blu-ray player.

Direct customer to booth selected.

Customer will have a blue screen in booth directing him to insert money to start preview.

After customer inserts money status will change to "Previewing".

Clear booth time remaining:

In the event a customer leaves with time remaining in either preview mode or arcade – highlight desired booth and press "clear time". You will be asked to confirm clearing – press Y.

Report Generator:

Press Report Generator Icon on desktop.

Select store by using System drop down menu (for multiple stores) Default is the local store.

Set business week start day using drop down menu.

Set Business day start time (local time)

For shift reports – select shift start times

There are two types of reports:

1.shift reports

2.weekly reports

Check the appropriate box to generate desired reports.

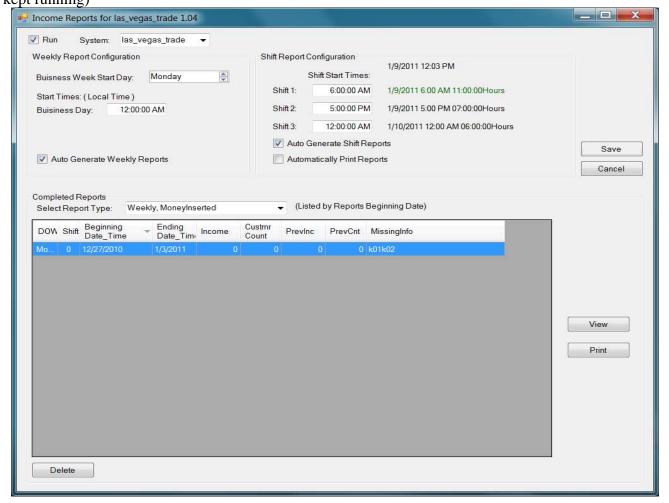

Generated reports are listed in the lower window.

Use the drop down box to select:

- 1.weekly, money inserted
- 2.weekly, money removed
- 3.shift, money inserted
- 4.shift, money removed.

Highlight desired report and press "view" for screen view and print or "print" to print direct without screen view

(Report generator program only retains data for the current period in which the program is started unless it is kept running)

Admin Kiosk:

Press the Admin Kiosk Icon on the desktop.
There are five areas:

- System status
 Config System
 Config Kiosks
 System information
 System monitor messages

System Status:

Displays for each kiosk:

- 1.Kiosk number
- 2.Time remaining
- 3.bill acceptor dollars since last clearing
- 4.TV Alarm status
- 5.Bill acceptor alarm status
- 6.Ethernet communication status (on line or off line)
- 7. Kiosk operation status:
 - a. idle
 - b. arcading
 - c. starting (for preview)
 d. previewing

Config System:

click on this heading to setup the kiosk operational parameters:

- 1. Number of booths- enter total number of booths
- 2. Number of channels- enter total number of system channels available
- 3.Business Day start time- enter the start time for your business day (hh:mm:ss)
- 4. Business week start day enter the first day for business week
- 5.Rates:

There are four rate structures (1-4)

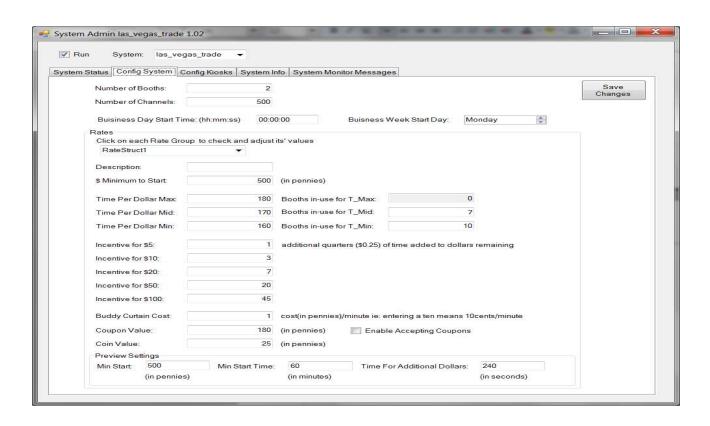

For each rate group you can assign the following:

- 1.Description enter rate structure description eg. Arcade, handicap booth etc.
- 2.\$ Minimum to start enter the minimum money required to start the kiosk.(100 = 1 dollar)
- 3. Time per dollar Max, Mid and Min are used to adjust the amount of time given when the number of booths in-use reach the Max, Mid and Min number of booths in-use thresholds.
- 4.Incentives can be given for inserting 5,10,20,50 and 100 dollars at one time. Time is added based on number of quarters added.
- 5.Buddy curtain cost- enter cost per minute to be deducted from viewing time for buddy curtain operation.
- 6. Coupon value enter value for store coupons check box to enable coupons for each rate structure.
- 7. Coin value- enter value for coins
- 8. Preview settings:

Enter Min start for Previews

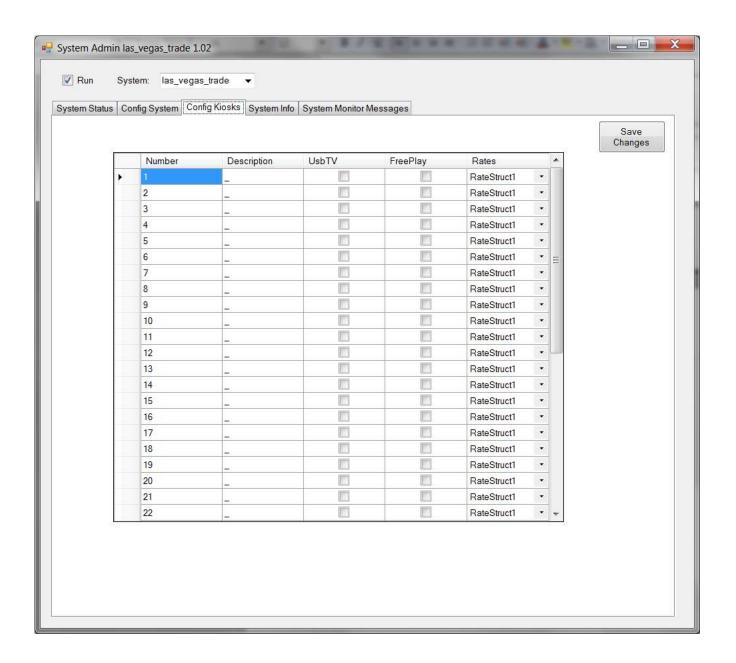

Enter time allocated for min start

enter the amount of time given for each dollar added over min start.

Config Kiosks:

For each Kiosk enter Description (if necessary) Check USBTV for preview booths only. Select Free Play for kiosks that will run continuously without money entered. Select appropriate rate structure for each kiosk (set up on previous page)

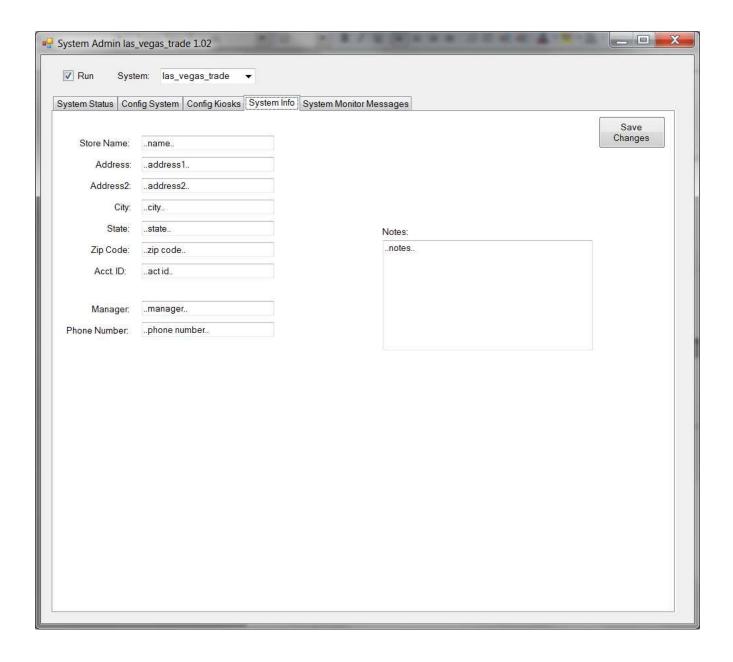

System Information:

Enter Store Name, address, city, state, zip Enter Account Id

Enter Manager name and phone number

Notes Area can be used for information such as key numbers et.

System Monitor Messages:

The dialog located on the Arcade system monitor and preview control is entered hear.
